

Hearthview™ See-Thru Gas Fireplace

*Shown with black painted Wilmington Face,
Straight Brick fireback and accent light options.*

Join an American tradition by heating your home with a Lopi gas fireplace.

The Hearthview See-Thru gas fireplace allows you to bring two rooms together with a different look for each side. Maintaining the balance and proportion between the firebox, logs and flames in this incredible see-thru gas fireplace, Lopi has designed the beautiful fire to be the focus. And with a combined 1,728 square inches of tempered glass, it gives you the largest viewing area in it's class.

The logs and fire have been carefully designed with a completely different look from either side. We dare you to compare the amazingly realistic hand-carved detail on the eight piece logset with any other see-thru fireplace on the market! Combined together with the unique two-stage stepped burner, the Lopi Hearthview See-Thru fireplace will give you a warm, yellow fire with glowing embers that your friends and family will have a hard time telling apart from a real wood fire.

No Other See-Thru Heats Like the Hearthview.

Unlike most other see-thru fireplaces, the Hearthview See-Thru is tested and approved to be Heater Rated. At 37,500 Btu's per hour input, the Hearthview See-Thru is designed to provide up to 1,500 sq. ft. of comfortable heat. At Lopi we emphasize the finishing touches, like the channeled convection chamber for even heat distribution from both sides of the fireplace. We have designed the convection area to be masked so you can't see through it, creating a more finished look. You have the option to increase the heat transfer with a quiet 130 CFM convection fan, and move heat to an additional room up to 20 feet away with our optional Power Heat Duct Kit.

Hearthview™ See-Thru Gas Fireplace

*Shown with brushed pewter plated Wilmington Face,
and Straight Brick fireback options.*

Designed For Year Round Use

The Hearthview features the Comfort Control Valve™, which allows the user virtually unlimited flame variation and the largest turn down rate of any see-thru gas fireplace. With the duel stage burner, you have the option of controlling two areas of flames independently. You can shut the center flame off completely and only use the outer burners, if less heat is desired. This is great for setting the mood and allowing the fireplace to be used throughout the entire year. Or turn off the fire altogether and turn on the optional interior Accent Light. This adjustable feature gives you all the ambiance of the fire, but without the flame or heat.

We Build Fireplaces Like No Others.

Our American manufactured fireplaces use only the highest quality materials available and we finish our products with perfection in mind. We design our fireplaces to the highest standards and stand behind our products with our dedicated manufacturing facility, trained hearth dealers and our Seven Year "Real World" warranty.

For the best in design, safety, ease-of-operation and comfort, demand a Lopi fireplace and find out why we have been America's Favorite Fire for nearly 30 years!

Features & Benefits

Basic Grill | Black

A Fireplace With Two Points of View

With two sides to the Hearthview ST fireplace Lopi gives you the ability to personalize each room using the same or a different face on each side of the fireplace. The Lopi Hearthview See-Thru allows you to choose from the basic grill set in black or brushed pewter, or pick one of the beautiful Wilmington upgrade faces in black paint or brushed pewter finishes. You can further customize your upgrade face with the floral patterned Arabesque grills in a brushed pewter finish.

Basic Grill | Pewter

Reversible Fireback Option

The Hearthview ST comes standard with black floor and sidewalls. If you would like to personalize the look choose the optional "reversible" fireback with Herringbone on one side or flip it over for the straight brick design.

Straight Brick Fireback

Herringbone Brick Fireback

Wilmington Black

Dual Accent Light Option

Add the Accent Light option to highlight the fireplace interior. With the adjustable Accent Light you can enjoy the fireplace even when the fire is off making the unit functional all year long.

Wilmington Black with Pewter Arabesque Grills

Andiron Option

The Hearthview not only lets you personalize the outside of your fireplace, but also the inside. Choose from three different cast Iron Andirons to finish the interior and accent the beautiful logs and flames. Add to one or both side.

Colonial

Arabesque

Wrought Iron.

Wilmington Pewter

Ease of Use

The Hearthview utilizes a standing pilot gas valve. This system allows the fireplace to generate it's own electricity to operate and allows you continuous enjoyment of the fire and heat, even if the power goes out. Beside manual operation with the included wall switch, the Hearthview allows you the option of hands-free operation by adding a Wall Thermostat. Other control options include the thermostatic Remote Control, which provides ON/OFF or thermostat operation or the Omega™ Remote Control which allows incremental control of the fire/heat output, controlable fan speed and intensity of the accent light options.

Aromatherapy

The Hearthview ST fireplace will not only warm you, but can soothe, relax and energize you with the optional Aromatherapy Tray with Essential Oils. Ask your Lopi dealer for a demonstration of this exclusive feature found only on Lopi products.
